

Restraining XM radio to not broadcast live weather reports is a restraint of trade. We the public should have the right to have paid broadcast with a format that can serve everyone. Please spend your time restraining the filth that television and public radio stations are programming. Howard Stern is but one of many that should have laws to prohibit them from broadcasting. If XM radio did not fullfill the needs of the public over normal broadcasting we surely would not be paying for the service! Reject NAB'S petition 04-160.  
Sincerely,

Dr. Richard L.Johnson
